

SECURITY POLICY

The ChemPro' Security Policy provides the foundation for all security related issues and activities within ChemPro aiming to promote security at the workplace and the collective responsibility of the management and all employees in observing security practices.

As part of the security management system framework, ChemPro aims to ensure safe, secure and efficient logistics for customers' value by protecting our company's employees, assets, information, integrity and reputation from potential threats.

To achieve this objective, ChemPro will ensure that our security management system is based on

- a. ISO 28000 : 2007;
- b. ChemPro organizational policies;
- c. current applicable legislation, regulatory and statutory requirements and other requirements.

ChemPro is committed to ensure the security of our operations through the continual improvement of our security management system.

This policy will be effectively communicated to our Business Partners so that they are aware of our security expectations.
